## Executive Summary

Aspiring software developer with a demonstrated history of hard work and multiple successes in the entrepreneurship and online retail industry. Extensive experience with multiple advanced entry to midlevel IT-related roles. Dynamic self-starter, who brings enthusiasm, efficiency, and attention to detail to any position. My strong professional background allows me to use my expanding software development and other technical skills. I enjoy collaborating with team members as well as independent work, contributing to productivity and enhancing any organization's long term success plan. As an eager lifelong learner, I look forward to adding to these skills and contributing to the world of technology and web programming.

## Experience

### **Associate Software Engineer**

Western Governors University

2021 - Present

Associate Software Engineer Intern in Business Intelligence - Data Engineering Department working with Python, SQL, Databricks, Spark and more in an Agile environment utilizing Scrum methodologies to perform ETL of gold, silver, and bronze level data in a Databricks Lakehouse for internal customers. Performing data classification using Collibra to attain and maintain data collection standards and processes enabling collaboration and compliant access to data assets while enabling necessary constraints for security and privacy.
